In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are

needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The transatlantic world has had immense influence on the direction of world history. The six illuminating studies in Transatlantic History address cultural exchanges and intercontinental developments that contribute to our modern understanding of global communities. Transatlantic history encompasses a variety of scholarly problems and approaches from multiple disciplines, and volume editors Steven G. Reinhardt and Dennis P. Reinhartz have assembled a collection of essays that reflect the diversity within the field. Introducing the book, William McNeill provides a unifying overview of the concept and practice of transatlantic history by placing it within the larger context of world history. The chapter authors bring distinctive styles and methods to the investigation of the processes of interaction and adaptation among Africans, Native Americans, and Europeans. Their studies range from the Spanish imperial crisis in the 1600s to the urbanization of Europe and the Americas, from graphic portrayals of the Atlantic world to the settlement of Ireland, America, and South Africa and the recent diaspora of West Africans. Readers interested in world history, communication, and cultural studies will find Transatlantic History provocative and challenging as it convincingly argues for the importance of this new field.

On September 10, 2001, the United States was the most open country in the world. But in the aftermath of the worst terrorist attacks on American soil, the U.S. government began to close its borders in an effort to fight terrorism. The Bush administration's goal was to build new lines of defense without stifling the flow of people and ideas from abroad that has helped build the world's most dynamic economy. Unfortunately, it didn't work out that way. Based on extensive interviews with the administration officials who were charged with securing the border after 9/11, and with many innocent people whose lives have been upended by the new security regulations, *The Closing of the American Border* is a striking and compelling assessment of the dangers faced by a nation that cuts itself off from the rest of the world.
