The Design of Future Educational Interfaces Bloomsbury Publishing

According to author Mike Schmoker, there is a yawning gap between the most well-known essential practices and the reality of most classrooms. This gap persists despite the hard, often heroic work done by many teachers and administrators. Schmoker believes that teachers and administrators may know what the best practices are, but they aren't using them or reinforcing them consistently. He asserts that our schools are protected by a buffer—a protective barrier that prevents scrutiny of instruction by outsiders. The buffer exists within the school as well. Teachers often know only what is going on in their classrooms—and they may be completely in the dark about what other teachers in the school are doing. Even principals, says Schmoker, don't have a clear view of the daily practices of teaching and learning in their schools. Schmoker suggests that we need to get beyond this buffer to confront the truth about what is happening in classrooms, and to allow teachers to learn from each other and to be supervised properly. He outlines a plan that focuses on the importance of consistent curriculum, authentic literacy education, and professional learning communities for teachers. What will students get out of this new approach? Learning for life. Schmoker argues passionately that students become learners for life when they have more opportunities to engage in strategic reading, writing with explicit guidance, and argument and discussion. Through strong teamwork, true leadership, and authentic learning, schools and their students can reach new heights. Results Now is a rally cry for educators to focus on what counts. If they do, Schmoker promises, the entire school community can count on unprecedented achievements.

Sponsored by the National Center on School Choice, a research consortium headed by Vanderbilt University, this volume examines the growth and outcomes of the charter school movement. Starting in 1992-93 when the nation's first charter school was opened in Minneapolis, the movement has now spread to 40 states and the District of Columbia and by 2005-06 enrolled 1,040,536 students in 3,613 charter schools. The purpose of this volume is to help monitor this fast-growing movement by compiling, organizing and making available some of the most rigorous and policy-relevant research on K-12 charter schools. Key features of this important new book include: Expertise - The National Center on School Choice includes internationally known scholars from the following institutions: Harvard University, Brown University, Stanford University, Brookings Institution, National Bureau of Economic Research and Northwest Evaluation Association. Cross-Disciplinary - The volume brings together material from related disciplines and methodologies that are associated with the individual and systemic effects of charter schools. Coherent Structure - Each section begins with a lengthy introduction that summarizes the themes and major findings of that section. A summarizing chapter by Mark Schneider, the Commissioner of the National Center on Educational Statistics, concludes the book. This volume is appropriate for researchers, instructors and graduate students in education policy programs and in political science and economics, as well as in-service administrators, policy makers, and providers.

Private Enterprise and Public Education Brookings Institution Press
Clay Christensen's groundbreaking bestselling work in education now updated and expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education. "Provocatively titled, *Disrupting Class* is just what America's K-12 education system needs—a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." —Joel Klein, Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." —Jim Collins, bestselling author of *Good to Great* "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. *Disrupting Class* is a must-read, as it shows us how we can blaze that trail toward transformation." —Jeb Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically—we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time—education—and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every student Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform We can compete in the global classroom—and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, *Disrupting Class* will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

Handbook of Action Research John Wiley & Sons

The global market for oil and gas resources is rapidly changing. Three major trends—the rise of new consumers, the increasing

influence of state players, and concerns about climate change—are combining to challenge existing regulatory structures, many of which have been in place for a half-century. *Global Energy Governance* analyzes the energy market from an institutionalist perspective and offers practical policy recommendations to deal with these new challenges. Much of the existing discourse on energy governance deals with hard security issues but neglects the challenges to global governance. *Global Energy Governance* fills this gap with perspectives on how regulatory institutions can ensure reliable sources of energy, evaluate financial risk, and provide emergency response mechanisms to deal with interruptions in supply. The authors bring together decisionmakers from industry, government, and civil society in order to address two central questions: •What are the current practices of existing institutions governing global oil and gas on financial markets? •How do these institutions need to adapt in order to meet the challenges of the twenty-first century? The resulting governance-oriented analysis of the three interlocking trends also provides the basis for policy recommendations to improve global regulation. In this volume, leading scholars from the fields of communication, educational psychology, and international education address what is known about the strategic role of interpersonal communication in the teaching/learning process. Instruction often involves spoken communication that carries information from teacher to

learner, and in these instances the teacher's skillful and strategic use of language has a measurable impact on learning outcomes. Thus, the cumulative findings of instructional communication research are instrumental in maximizing the efficiency and effectiveness of both teaching and learning. Major sections of this volume include: Historical and Theoretical Foundations Instructor Characteristics and Behaviors Student Characteristics and Outcomes Pedagogy and Classroom Management Teaching and Learning Communication Across the Life-span This handbook serves researchers, professors, and graduate students by surveying the collective findings of research and experience concerning the intentional activity of teaching and learning.

A NOW READ THIS PBS NewsHour and New York Times Book Review selection From the New York Times best-selling author of *How Children Succeed* comes an essential handbook of successful strategies to help kids overcome issues, learn, and thrive in today's chaotic learning environments. In *How Children Succeed*, Paul Tough introduced us to research showing that personal qualities like perseverance, self-control, and conscientiousness play a critical role in children's success. Now, in *Helping Children Succeed*, Tough takes on a new set of pressing questions: What does growing up with economic and other stresses do to children's mental and physical development? How does adversity at home affect their success in the classroom, from preschool to high school? And what practical steps can the adults who are responsible for them take to improve their chances for a positive future? Tough once again encourages us to think in a new way about the challenges of childhood. Mining the latest research in psychology and neuroscience, he provides us with insights and strategies for a new approach to childhood adversity, one designed to help many more children succeed.

Critical Management Studies (CMS) has emerged as a movement that questions the authority and relevance of mainstream thinking and practice. Critical of established social practices and institutional arrangements, it challenges prevailing systems of domination and promotes the development of alternatives to them. CMS draws upon diverse critical traditions. Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory. From these foundations, CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives - ranging from labour process theory to radical feminism. In recent times, a set of ideas broadly labelled 'poststructuralist' have been developed to complement and challenge the insights of Critical Theory, giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice. The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches, key topics, issues, and subject specialisms in management studies, as well as a set of reflections on the progress and prospects of CMS. Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice. Given the rapid growth of the CMS movement, its ever increasing theoretical and geographical diversity and its outreach into the public sphere, The Oxford Handbook of Critical Management Studies is a timely publication. In addition to UK contributors, where CMS has developed most rapidly, there is strong representation from North American contributors as well as from areas where CMS has taken hold more recently, such as Australasia.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of

Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.
