The first four chapters of the text describe different types of signals, modulation and demodulation of these signals, various transmission channels and noise encountered by the signals during propagation from sender to receiver end. Apart from this, this part of the book also deals with different forms of line communication systems. A brief introduction of information theory is also given at the end of the text so that the students become familiar with this aspect of communication systems.

Ludelphia Bennett may be blind in one eye, but that doesn't mean she can't put in a good stitch. In fact, Ludelphia sews all the time, especially when things are going wrong. But when Mama gets deathly ill, it doesn't seem like even quilting will help. Mama needs medicine badly—medicine that can only be found in Camden, over forty miles away. That's when Ludelphia decides to do something drastic—leave Gee's Bend. Beyond the cotton fields of her small sharecropping community, Ludelphia discovers a world she never imagined, but there's also danger lurking for a young girl on her own. Set in 1932 and inspired by the rich quilting traditions of Gee's Bend, Alabama, *Leaving Gee's Bend* is a delightful story of a young girl facing a brave new world, presented in a new paperback edition.
