Awakening: An Introduction to the History of Eastern Thought engages students with lively anecdotes, essential primary and secondary sources, an accessible writing style, and a clear historical approach. The text focuses primarily on India, China, and Japan, while showing the relationships that exist between Eastern and Western traditions. Patrick Bresnan consistently links the past to the present, so students may see that Eastern traditions, however ancient their

origins, are living traditions and relevant to modern times. Updates to the Sixth Edition include a new introduction as well as new approaches to problem areas throughout the text, but with special emphasis in Chapter 5 (Ashtanga Yoga), Chapter 10 (Basic Teaching of Shakyamuni Buddha), Chapter 12 (Mahayana Buddhism: Madhyamaka section) and Chapter 18 (Chan Buddhism: regarding the relationship of Chan Buddhism to Zen Buddhism). In addition, all references and source

material have been brought up to date. The companion website includes two new videos and many new photos, produced by the author. New to this Sixth Edition:

World History Teaching in
Asia is the first broad
survey of the content and
approaches used to teach
world history in secondary
schools and colleges in
Asia. The collection has
been crafted by scholars
and educators whose goal
was to shed light on the
importance of history
education and to foster

between Asian countries.

These essays show how
the teaching of world
history in Asian countries
has developed since
World War II, with many
interesting parallels,
including the issue of
Eurocentrism, but also
distinctive national
trends, and considerable
changes over time. At a
time when many Asian
countries are making
great strides in education,
this study of history

Council of War: A History of the Joint Chiefs of Staff, 1942--1991 follows in the tradition of volumes previously prepared by the joint History Office dealing with JCS involvement in national policy, the Korean War, and the Vietnam War.

Adopting a broader view than earlier volumes, it surveys the JCS role and contributions from the early days of World War II through the end of the Cold War. Written from a combination of primary and secondary sources, it is a fresh work of scholarship, looking at the problems of this era and their military implications. The main prism is that of the joint Chiefs of Staff, but in laying out the JCS perspective, it deals also with the wider impact of key decisions and the ensuing policies. The

narrative traces the role and influence of the Joint Chiefs of Staff from their creation in 1942 through the end of the Cold War in 1991. It is, first and foremost, a history of events and their impact on national policy. It is also a history of the Joint Chiefs of Staff themselves and their evolving organization, a reflection in many ways of the problems they faced and how they elected to address them. Over the years, the Joint History Office has produced and published numerous

detailed monographs on JCS participation in national security policy. There has never been, however, a single-volume narrative summary of the JCS role. This book, written from a combination of primary and secondary sources, seeks to fill that void.
