This book provides a study of the forces underlying the development of economic thought at Cambridge University during the late nineteenth century and the first half of the twentieth century. The primary lens it uses to do so is an examination of

how Arthur Cecil Pigou's thinking, heavily influenced by his predecessor, Alfred Marshall, evolved. Aspects of Pigou's context, biography and philosophical grounding are reconstructed and then situated within the framework of Ludwik Fleck's philosophy of scientific knowledge, most notably by drawing on the notions of 'thought styles' and 'thought collectives'. In this way, Knight provides a novel contribution to the history of Pigou's economic

thought.

A.C. Pigou and the 'Marshallian' Thought Style Farrar, Straus and Giroux

High quality, engaging content for

students...ultimate flexibility for educators.

The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content - your way. Economics 7th edition provides a

streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. By leaving the more technical content and application until later, students can enjoy the more exciting policy material from the beginning and engage with the content early. Through compelling examples, clear explanations and the latest instructive on-line resources, the text draws students into the content and reinforces learning

through practice and solving problems which are relevant to them. The authors train students to think about issues in the way real economists do, and learn how to explore difficult policy problems and make more informed decisions by offering a clear introduction to theory and applying the concepts to today's events, news, and research. A new and innovative suite of learning and teaching solutions accompany the text, including the free Study on the Go mobile

app and tighter integration with MyEconLab, all designed to help lecturers deliver a successful course. *The humanities and social sciences.* A Springer The distinguished historian A.N. Wilson has charted, in vivid detail, Britain's rise to world dominance, a tale of how one small island nation came to be the mightiest, richest country on earth, reigning over much of the globe. Now in his much anticipated sequel to the classic *The Victorians*, he describes how in little

more than a generation Britain's power and influence in the world would virtually dissolve. In After the Victorians, Wilson presents a panoramic view of an era, stretching from the death of Queen Victoria in 1901 to the dawn of the cold war in the early 1950s. He offers riveting accounts of the savagery of World War I and the world-altering upheaval of the Communist Revolution. He explains Britain's role in shaping the destiny of the Middle East. And he casts a bright new light on

the World War II years: Britain played a central role in defeating Germany but at a severe cost. The nation would emerge from the war bankrupt and fatally weakened, sidelined from world politics, while America would assume the mantle of dominant world power, facing off against the Soviet Union in the cold war. Wilson's perspective is not confined to the trenches of the battlefield and the halls of parliament: he also examines the parallel story of the beginnings of

Modernism—he visits the novelists, philosophers, poets, and painters to see what they reveal about the activities of the politicians, scientists, and generals. Blending military, political, social, and cultural history of the most dramatic kind, A.N. Wilson offers an absorbing portrait of the decline of one of the world's great powers. The result is a fresh account of the birth pangs of the modern world, as well as a timely analysis of imperialism and its discontents.

Our Social World

University of Ottawa Press
"To change the way
students see the world:
this is my goal in teaching
economics and in writing
this book. Three facts
about students are my
guiding principles. First,

they want to learn, but they are over-whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's world and be better prepared for life after school. So, they must be shown how to apply the timeless principles of

economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles"--

One hot topic in contemporary linguistics concerns how we express the passage of time in natural language. In particular, interesting

questions have been raised as to how formerly understudied languages fit into deep-rooted theoretical frameworks, which among other features comprise a grammatical category of tense. This monograph mainly contributes to this debate in two complementary ways: through a detailed description of a large set of new data from two varieties of Caboverdean, a Portuguese-related language, and through a novel approach to the role of its few temporal

morphemes, which allows to better define how tense meanings, aspect, and mood, together with other linguistic and extralinguistic information, provide what we understand as past, present, and future. The adequate study of this non-standardized language, with its impressive internal variation, thus brings new insights to old theoretical problems. Additionally, a welcome side effect of these new descriptions and analyses is that they promote a scientifically

grounded attitude towards linguistic diversity.

Our Social World: Introduction to Sociology, Brief Edition introduces the discipline of sociology to the contemporary student and provides an integrated, comprehensible framework from which to view the world in a concise format. In each chapter, authors Jeanne H. Ballantine and Keith A.

Roberts provide an organizing theme that is not exclusively tied to one theoretical paradigm to help students see relationships between topics. Our Social World presents the perspective of students living in the larger global world. Features of this brief edition: - Offers a strong global focus: A global perspective is integrated into each chapter to encourage students to think of global society as a logical extension of their own micro world. - Deep Learning Approach:

Encourages Students to think critically about the social World - Presents The Social World Model in each chapter: This organizing framework helps students understand the interrelatedness of core concepts.

"This handbook contains thirty-two previously unpublished contributions to consequentialist ethics by leading scholars, covering what's happening in the field today as well as pointing to new directions for future research.
Consequentialism is a rival to such moral theories as deontology, contractualism, and virtue ethics. But it's more than just one rival among

many, for every plausible moral theory must concede that the goodness of an act's consequences is something that matters even if it's not the only thing that matters. Thus, all plausible moral theories will accept both that the fact that an act would produce good consequences constitutes a moral reason to perform it and that the better that act's consequences the moral reason there is to perform it. Now, if this is correct, then much of the research concerning

consequentialist ethics is important for ethics in general. For instance, one thing that consequentialist researchers have investigated is what sorts of consequences matter: the consequences that some act would have or the consequences that it could have-if, say, the agent were to follow up by performing some subsequent act. And it's reasonable to suppose that the answer to such questions will be relevant for normative ethics regardless of whether the

goodness of consequences is the only thing matters (as consequentialists presume) or just one of many things that matter (as non-consequentialists presume)"--
Canadian Periodical Index Texas A&M University Press
 The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions,

government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people

who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will force us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution,

and recovery to include all, not just some.

Published in English with some chapters in French.

The Decline of Britain in the World Springer

This book is open access under a CC BY 4.0 license.

This book explores the implications of acknowledging uncertainty and black swans for regulation of high-hazard technologies, for stakeholder acceptability of potentially hazardous activities and for risk governance. The conventional approach to risk assessment, which

combines the likelihood of an event and the severity of its consequences, is poorly suited to situations where uncertainty and ambiguity are prominent features of the risk landscape. The new definition of risk used by ISO, “the effect of uncertainty on [achievement of] one’s objectives”, recognizes this paradigm change. What lessons can we draw from the management of fire hazards in Edo-era Japan? Are there situations in which increasing uncertainty

allows more effective safety management? How should society address the risk of potentially planet-destroying scientific experiments?

This book presents insights from leading scholars in different disciplines to challenge current risk governance and safety management practice.

Microeconomics Available electronically in an open-access, full-text edition from the Texas

A&M University Libraries' Digital Repository at <http://hdl.handle.net/1969.1/146844>. Frank N. McMillan Jr., a country boy steeped in the traditional culture of rural Texas, was summoned to a life-long quest for meaning by a dream lion he met in the night. On his journey, he followed the lead of the founder of analytical psychology, Carl Jung, and eventually established the world's first professorship to advance the study of that field. McMillan, born and raised on a ranch near Calvert, was an

Aggie through and through, with degrees in geology and petroleum engineering. As an adult working near Bay City, Texas, he was lunching in a country café when by chance he met abstract expressionist painter Forrest Bess, who was ecstatically waving a letter he had received from Jung himself. The artist's enthusiastic description of Jung as a master psychologist, soul doctor, and healer led McMillan to the Jung Center in Houston, where he began reading Jung's

Collected Works. McMillan frequently said, “Jung saved my life.” Finding Jung: Frank N. McMillan Jr., a Life in Quest of the Lion captures McMillan’s journey through the words of his own journals and through reflections by his son, Frank III. David Rosen, the holder of the first endowed McMillan professorship at Texas A&M University, adds insights to the book, and the late Sir Laurens van der Post, whom the elder McMillan met at the Houston Jung Center in 1979, authored a

foreword to the book before his death. This is a story that sheds light on the inner workings of the self as well as the Jungian understanding of the Self. In often lyrical language, it gives the human background to a major undertaking in the dissemination of Jungian scholarship and provides a personal account of a life lived in near-mythic dimensions.

**Geographical section
A-Q. Vol. 1**

Cape Town, South Africa, 7 Sept. 2016 – 8 Sept. 2016. Theme: Sustainable

economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow

conference delegates. Methodology: The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm, where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to

collect data. However, there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology. Contribution made to scholarship: The articles come from individual researchers and each article in the proceedings is unique. Mostly, there is no general argument leading from one contribution to the next.

However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on

elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful, and, as such, new strategies are needed to reinforce efforts to nurture and

invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles' contribution reemphasised technology education and training as

a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business, education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing

policies and regulations for their review or amendment.
