Principles and Practice Jones & Bartlett Learning

This study guide has been produced to complement the training text, Marine Fire Prevention, Fire-fighting, and Fire Safety, published by the U.S. Department of Transportation, Maritime Administration. Although the basic principles in marine fire-fighting have not changed, this study

guide offers up-to-date information for a better understanding of the principles and the methodologies involved. In addition, this study guide includes all the contents required for a U.S. Coast Guard-approved marine fire-fighting course, as well as meets all the competencies for the International Convention for the Standards of Training, Certification, and Watchkeeping (STCW), per the latest 2010 Manila amendments. Moreover, this study utilises current-day examples, equipment, and techniques, breaking down the text into twelve easy-to-follow lessons: basic shipboard fire-fighting organisation and safety, causes of fires and methods of prevention, theories of fire, combating fire, extinguishing agents, extinguishing appliances, fire detection systems, fixed fire extinguishing systems, safety and fire-fighting equipment, and respirators and the self-contained breathing apparatus. These lessons will provide the students the knowledge to not only successfully fight shipboard fires, but prevent such fires and in doing so, keep his/her ship and all that ply the seas onboard safe.

Step Up and Lead John Wiley & Sons

Chief Dunn—the recipient of FDNY’s Lifetime Achievement Award—has updated his classic book on how to identify and survive hazards on the fireground. Dunn attempts to reduce firefighter deaths and injuries year after year by describing the 15 most dangerous tactics and the 13 most recurring fire and explosion environmental dangers, ranked by degree of danger and frequency of occurrence. This indispensable book will help keep every first responder, firefighter, and fire officer out of harm’s way. It is a must-read and reread for every firefighter who responds to fires and emergencies, every company officer who commands a fire company, and every incident commander or safety officer who is responsible for the safety of firefighters on the fireground. NEW TO THIS EDITION • Examination of “aggressive interior firefighting attack” and “nonaggressive attack” • Discussion of risk intensity and risk frequency at the fireground • Visual representation and discussion of the NIST five-stage time/temperature fire growth curve showing temperatures before and after firefighter venting • Coverage of the Columbia University Capstone Project: FDNY Property Saved Indicator, with a formula to quickly calculate the dollar amount of property saved at a structure fire • Updated statistics, graphs, and charts

Brannigan's Building Construction for the Fire Service, Fourth Edition is a must read for fire fighters, prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs every aspect of this new edition of the text. Listen to a Podcast with Brannigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition.
