Statistics and Probability with Applications (High School) Springer Nature Statistics With Technology, Second Edition, is an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation

of data is more important than how to compute basic statistical values. *Introductory Statistics* Prentice Hall ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that youselect the correct ISBN.
