The U.S. Department of Defense (DoD) faces short-term and long-term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions. The DoD has established standards for aptitudes/abilities, medical conditions, and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service

(generally 36 months). In 1999, the Committee on the Youth Population and Military Recruitment was established by the National Research Council (NRC) in response to a request from the DoD. One focus of the committee's work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs. When the committee began its work in 1999, the Army, the Navy, and the Air Force had recently experienced recruiting shortfalls. By the early 2000s, all the Services were meeting their goals;

however, in the first half of calendar year 2005, both the Army and the Marine Corps experienced recruiting difficulties and, in some months, shortfalls. When recruiting goals are not being met, scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost, job performance, attrition, and the health of the force. *Assessing Fitness for Military Enlistment* examines the current physical, medical, and mental health standards for military enlistment in light of (1) trends in the physical condition of the youth population; (2) medical advances for treating certain conditions, as well as knowledge of the typical course of chronic conditions as young people reach adulthood; (3) the role of basic training in physical conditioning; (4) the physical demands and working conditions of various jobs in today's military services; and (5) the measures that are used by the Services to characterize an individual's physical condition. The focus is on the enlistment of 18- to

24-year-olds and their first term of service.

State vs. Society in Northeast India: History, Politics and the Everyday looks at a state as an entity that does not operate strictly as a rational, legal and administrative organization. State in the Northeast region is very much shaped by the social, economic and political practices on the ground. Using archival and ethnographic evidences, the book questions notions of region and border as fixed spaces. A state, in the process of governing society, produces itself through formal and informal practices on the ground, and the book argues that Northeast India is a significant site for studying this. It engages with conceptual, theoretical and methodological challenges thrown up by the political experiences of ordinary people in the Northeast. The book discusses everyday legal discourse, official public memory, development discourse, cases of becoming marginalized, resistance and ways of networking with the

authorities. The objective is to understand the various ways in which state and society engage with each other; and to look at layers of historical interconnections that inform much of contemporary Northeast politics. The book will especially be of interest to scholars in politics, history, sociology and anthropology.

To be asked to prepare a

second edition of a book

is heartening for any

author or editor. Apart

from the opportunity to

make the corrections and

amendments which are

inevitable in a practical

manual there is also the

possibility to make

additions which enhance

its usefulness. Above all a

further edition usually

means that the book has

been found to be accept

able to a large number of

readers and has fulfilled a

need. This is indeed the

case with *Offshore*

Medicine, which in its

description of the medical

aspects of offshore work

has provided a unique

guide to the occupational

health of a new industry.

The rapid development of

offshore exploration for

gas and oil which began in

the 1960s created a

whole new range of

related industries. Most attention was focused on the problems of deep diving in the North Sea because of the great expansion of the diving industry, its technological advances and the high mortality of divers in the early years. Diving, however, is only a fraction of the total endeavour concerned with the offshore industry. The much larger population of workers offshore who man the rigs and barges, the toolpushers, helicopter pilots, crane drivers, scaffolders and roustabouts, geologists and so on, so sympathetically described by A. Alvarez in his recent book *Off shore, A North Sea Journey*, and the harsh and difficult conditions in which they often have to work are sometimes forgotten.

This book critically investigates the conditions of seafarers' rights in China in legislation and in practice, focusing in particular on the restructuring process following the 2006 Maritime Labour Convention. Accordingly, it poses key research questions to major Chinese stakeholders to gauge their responses to the Convention, to determine whether the protection of Chinese seafarers has actually improved since the advent of the Convention, and further, to identify the continuing challenges for future improvement. The Convention will enter into force in China in November 2016, bringing with it significant changes.

 The ambiguous state of our legal structure and its formats leave the common man with no grasp of the basics of the system in which he lives. Treatises and documents

are boundless, but yet so vague and so verbose, that one has neither the time to read it nor to even glance it. Over the years it is greatly felt that a standing reference material which can help a bank worker to be aware of this rights as bank employee is necessary. Hence this effort on the part of mine to give you a summary of your rights as a bank employee edited from the available sources. This document is exhaustive and gives the most correct picture of our rights... This book is for all. The objectives of this book are to enable activists to understand important concepts in domestic enquiries, with practical illustrations and to get insightful understanding of changing environment of

service conditions followed in banks and other sectors. it is hoped that books will be useful and will be a tool for effective defence assistant in days to come. Every line present day's employees in banks are now referring as a service condition and benefits has got an historical struggle and historical negotiation. Remember, the task of the union to shape your life, career and future was never an easy way or path. These benefits are hard earned rights in tough times. Now you hold the responsibility to preserve, protect, and improve them. Let thousand hands join and build our movement strong. Success is not a destination but it is a journey.
