Infinite Jest Turtleback

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales

clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. *Nickel and Dimed* reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever.

Americanized: Rebel Without a Green Card Simon and Schuster

Newly updated: The bestseller “that could bring the human race a little closer to rescuing itself” from the subject of the film *The Two Glorias* (Naomi Wolf). Without self-esteem, the only change is an exchange of masters; with it, there is no need for masters. When trying to find books to give to “the countless brave and smart women I met who didn’t think of themselves as either brave or smart,” Steinem realized that books either supposed that external political change would cure everything or that internal change would. None linked internal and external change together in a seamless circle of cause and effect, effect and cause. She undertook to write such a book, and ended up transforming her life, as well as the lives of others. The result of her reflections is this truly transformative book: part personal collection of stories from her own life and the lives of many others, part revolutionary guide to finding community and inspiration. Steinem finds role models in a very young and uncertain Gandhi as well as unlikely heroes from the streets to history. *Revolution from Within* addresses the core issues of self-authority and unjust external authority, and argues

that the first is necessary to transform the second. This ebook features an illustrated biography of Gloria Steinem including rare images from the author’s personal collection, as well as a new preface and list of book recommendations from Steinem.

Winner of the 2016 International Dublin Literary Award "Gorgeously tender at its core...beautiful, heartstopping...Family Life really blazes." —Sonali Deraniyagala, *New York Times Book Review* Hailed as a "supreme storyteller" (*Philadelphia Inquirer*) for his "cunning, dismaying and beautifully conceived" fiction (*New York Times*), Akhil Sharma is possessed of a narrative voice "as hypnotic as those found in the pages of Dostoyevsky" (*The Nation*). In his highly anticipated second novel, *Family Life*, he delivers a story of astonishing intensity and emotional precision. We meet the Mishra family in Delhi in 1978, where eight-year-old Ajay and his older brother Birju play cricket in the streets, waiting for the day when their plane tickets will arrive and they and their mother can fly across the world and join

their father in America. America to the Mishras is, indeed, everything they could have imagined and more: when automatic glass doors open before them, they feel that surely they must have been mistaken for somebody important. Pressing an elevator button and the elevator closing its doors and rising, they have a feeling of power at the fact that the elevator is obeying them. Life is extraordinary until tragedy strikes, leaving one brother severely brain-damaged and the other lost and virtually orphaned in a strange land. Ajay, the family’s younger son, prays to a God he envisions as Superman, longing to find his place amid the ruins of his family’s new life. Heart-wrenching and darkly funny, *Family Life* is a universal story of a boy torn between duty and his own survival.

 “Beliefs about men and women are as old as humanity itself, but Fine’s funny, spiky book gives reason to hope that we’ve heard Testosterone rex’s last roar.”

—Annie Murphy Paul, New York Times Book Review Many people believe that, at its core, biological sex is a fundamental force in human development. According to this false-yet-familiar story, the divisions between men and women are in nature alone and not part of culture. Drawing on evolutionary science, psychology, neuroscience, endocrinology, and philosophy, Testosterone Rex disproves this ingrained myth and calls for a more equal society based on both sexes’ full human potential.

LIFE Vintage
 A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company,

she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy,

democracy, and the limits of human knowledge.

Testosterone Rex: Myths of Sex, Science, and Society W. W. Norton & Company

In development as a television series from Reese Witherspoon's Hello Sunshine production company and ABC Studios!

This hilarious, poignant and true story of one teen's experience growing up in America as an undocumented immigrant

from the Middle East is an increasingly necessary read in today's divisive world. Perfect for fans of Mindy Kaling and Trevor Noah's books. "Very funny but never flippant, Saedi mixes '90s pop culture references, adolescent angst and Iranian history into an intimate, informative narrative." —The New York Times At thirteen, bright-eyed, straight-A student Sara Saedi uncovered a terrible family secret: she was breaking the law simply by living in the United States. Only two years old when her parents fled Iran, she didn't learn of her undocumented status until her older sister wanted to apply for an after-school job, but couldn't because she didn't have a Social Security number. Fear of deportation kept Sara up at night, but it didn't keep her from being a teenager. She desperately wanted a green card, along with clear skin, her own car, and a boyfriend. Americanized follows Sara's progress toward getting her green card, but that's only a portion of her experiences as an Iranian-"American" teenager. From discovering that her parents secretly divorced to facilitate her mother's green card application to learning how to tame her unibrow, Sara

pivots gracefully from the terrifying prospect that she might be kicked out of the country at any time to the almost-as-terrifying possibility that she might be the only one of her friends without a date to the prom. This moving, often hilarious story is for anyone who has ever shared either fear. **FEATURED ON NPR'S FRESH AIR A NYPL BEST BOOK OF THE YEAR A CHICAGO PUBLIC LIBRARY BEST OF THE BEST BOOK SELECTION A SCHOOL LIBRARY JOURNAL BEST BOOK OF THE YEAR FOUR STARRED REVIEWS!** "A must-read, vitally important memoir. . . . and around the magical city-state of New Crobuzon, have the refreshing effect of making Middle-earth seem plodding and flat."—*The New York Times* The metropolis of New Crobuzon sprawls at the center of the world. Humans and mutants and arcane races brood in the gloom beneath its chimneys, where the river is sluggish with unnatural effluent and foundries pound into the night. For a thousand years, the Parliament and its brutal militias have ruled over a vast economy of workers and artists, spies and soldiers, magicians, crooks, and junkies. Now a stranger has arrived, with a pocketful of gold and an impossible demand. And something unthinkable is released. The city is gripped by an alien terror. The fate of millions lies with a clutch of renegades. A reckoning is due at the city's heart, in the vast edifice of brick and wood and steel under the vaults of Perdido Street Station. It is too late to escape. *Ks3 Success Workbook English 4-7* Springer Science & Business Media Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade

modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These

"weapons of math destruction" score teachers and students, sort r sum s, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in

the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016
